Ningbo Lv Kang Vehicle Co.,Ltd. is located in Ningbo city, Zhejiang province, which is only 90km away from Ningbo port and 200km away from Shanghai port. We are a manufacturer specializing in designing and manufacturing electric bikes and electric scooters since 2005. We own a factory area of 12000m², including workshops of frame welding, frame painting, motor production and assembling production lines, which allows our annual output capacity to reach 50000 sets.

Our company offers a responsible and professional R&D team corresponding to customers' unique requirements. We also possess inspection facilities to monitor every procedure and detail by testing frame strength and battery/motor/display electric system performance. We are ISO9001 and BSCI certified. Our products could also be certified according to CE, EN15194, ROHS, UL2849 or other standards/certificates.

Customer satisfaction is our goal, and we want to be your reliable partner. Thus, we present a dedicated team corresponding to each stage of operation, to build a mutually beneficial business relationship.

For more E-bike models,
please contact us

We administer fast yet efficient R&D speed and professional production standards, to provide our customers with advanced world class services.

Please contact us if you want to find a better supplier for your current products.

Please contact us if you have your own design and need to make moulds and samples

Please contact us if you have your own idea of design and need to find a factory to finalize the design , make moulds and samples.
